Public Accountability Meeting
September 2020
Response to Corona Virus

Strengths - Strategic Approach

Strengths - Strategic Priorities

- Minimise exposure, cross contamination and the risk of spreading Covid-19 to the public, our partners or within NYFRS
- Maximise our ability to maintain critical service delivery
- Manage the expectations of the public and key stakeholders to maintain their trust and confidence
- Maintain the trust and confidence of our employees and volunteers by keeping them suitably informed, equipped and supported to perform their duties
- Support the activities of other agencies, through coordinated response, in the protection of our communities, particularly the highly vulnerable, in accordance with the Tri Statement and the Civil Contingencies Act 2004
- Create new ways of working for the future, building upon the learning of adapted working practices to inform improvements in our effectiveness, efficiency and wellbeing, whilst recognising and working within the current local and national Industrial Relations protocols
- Ensure our decisions take account of the work of partners, in particular the police, to ensure a cohesive approach to Covid -19 recovery is achieved

COVID-19 Risk Rating

The current COVID-19 Risk Level is **Amber**

What Does This Mean?

Over recent weeks the Covid-19 picture has changed significantly, the national reproduction rate of the virus (R) has reduced from above 3 to below 1. As the national lockdown is eased there is a need for NYFRS to move in a similar direction where possible.

Challenges – Support for other agencies

Samuel Baxter as Fire Services Cadet in the presence of Fire Chief @NYFRSABrodie Congratulations Samuel u are a history maker twice over 1st cadet & a virtual ceremony! @SMHambleton1 @Nor_NYFRS @NYorksGossip @NorthYorksFire #HighSheriff #Fireservice

CHIMNEY FIRES - DON'T RISK IT!

Thank you to Charlie Morton for supplying a guest article this month on the important issue of chimney fires and how to avoid them.

In England, there are an average of 7,000 chimney fires per year, many of which can be prevented with regular sweeping; chimneys with oil and gas fires should be swept once a year, coal - twice a year, wood - up to four times a year.

You should also make sure you have working smoke alarms in your home. These are ways that lower the chance of a chimney fire in your home and reduce the risks of damage, injury or even death if one occurs.

*Charlie Morton,
Northallerton Fire Cadets.*
